CHARAN M GOWDA

Bengaluru, Karnataka – 560095 | +91 8317383403 | charangowda946@gmail.com

PROFESSIONAL SUMMARY

Motivated Bachelor of Computer Applications (BCA) graduate with a strong academic background (7.85 CGPA) in computer science, software engineering, and cybersecurity. Equipped with hands-on experience in Python development, REST API design, ethical hacking principles, and cloud infrastructure (AWS). Demonstrates strong analytical thinking, technical problem-solving, and collaborative team skills, eager to contribute effectively to software engineering or cybersecurity teams.

EDUCATION

St. Francis College — *Bachelor of Computer Applications (BCA)* Bengaluru, India

- Academic Performance: **7.85 CGPA**
  - Core Coursework: Programming Languages, Software Engineering, Database Management Systems, Computer Networks, Operating Systems, Web Technologies

Krupanidhi Group of Institutions — *Pre-University (PCMC)* Graduated 03/2023

- Focus: Physics, Chemistry, Mathematics, and Computer Science

TECHNICAL & PROFESSIONAL SKILLS

Programming & Scripting:	Python, SQL, HTML5, CSS3, JavaScript basics
Cybersecurity & InfoSec:	Ethical Hacking Fundamentals, Vulnerability Assessment, Network Security, Data Loss Prevention (DLP)
Cloud & Infrastructure:	AWS (S3, IAM), Firebase Storage, Cloud Deployment Basics
Frameworks & Databases:	Flask REST APIs, SQLite, Relational Database Design
Tools & Platforms:	Git & GitHub, VS Code, Microsoft Excel, Microsoft Word, Postman
Core Competencies:	Documentation Review, Time Management, Analytical Problem Solving, Cross-Functional Collaboration

KEY PROJECTS

GhostDrive – Secure Multi-Cloud Cryptographic Storage Platform Python, Flask, SQLite, AWS S3

- Architected backend REST APIs using Python Flask and SQLite for encrypted multi-cloud file management.
  - Implemented cryptographic security layers including AES data encryption, key generation, and error-correcting steganography.
  - Integrated cloud storage buckets (AWS S3, Firebase) with strict IAM user access control and responsive SPA dashboard.

ScanGuard – Content Inspection & Data Loss Prevention System Python, Flask, AWS boto3

- Developed proxy filtering services in Flask with automated pattern-matching checks to prevent data leaks.
  - Integrated Amazon S3 bucket storage using boto3 for secure file auditing and automated compliance logging.

CERTIFICATIONS & TRAINING

- **Value Added Course on Ethical Hacking** – Practical training in network security, penetration testing fundamentals, and vulnerability assessment methodologies.
- **Getting Started with Artificial Intelligence** – IBM SkillsBuild (Verified Credly Badge, Feb 2026).
- **Cybersecurity Beginners Certification** – Core information security components, defensive security measures, and threat detection.
- **AWS Cloud Computing Workshop** – Hands-on session on core AWS architecture, storage (S3), compute, and IAM security.

LANGUAGES

English (Full Professional) | **Kannada** (Native / Bilingual) | **Hindi** (Professional Working) | **Telugu** (Conversational)
